Vidhyarth Patel

Full Stack Developer

+91-8200133902 | vidyarthpatel@gmail.com | vidhyarth.me | linkedin.com/in/vidhyarth-patel | github.com/VidhyarthPatel

SKILLS

Languages: JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Framer Motion, TailwindCSS

Backend: Node.js, Express.js, WebSocket, WebRTC, Web Audio API

Databases and ORM: PostgreSQL, MongoDB, Prisma

Tools and Platforms: Git, GitHub, Vercel, VS Code, Postman

EXPERIENCE

Software Developer Intern January 2026 – Present

Quantamise Code Bangalore, India (Remote)

- Contributed to a SaaS platform serving 500+ active users, building 10+ scalable features and refactoring core architecture to cut API response times by 35%
- Built an internal HRMS (Human Resource Management System) automating workflows for 50+ employees, reducing manual HR processing time by 40%
- Designed and developed the company's official website, improving Lighthouse performance scores by 45% and cutting page load time by 30% through responsive, optimized UI/UX

Frontend Developer (Freelance) December 2024 – February 2025

Vedastik Remote

- Engineered responsive, high-performance user interfaces using React.js and Tailwind CSS, achieving 100% mobile compatibility and cross-browser consistency across 5+ browsers
- Architected a library of 20+ reusable UI components, reducing frontend development time by 40% and ensuring codebase scalability for future feature updates
- Followed modern frontend best practices to deliver clean, maintainable, production-ready code, cutting code review revisions by 25%

PROJECTS

Real-World E-Commerce Platform *Next.js, PostgreSQL, Prisma, Razorpay*

Live

- Architected and deployed a production-ready e-commerce platform integrating Razorpay payment gateway, JWT-based authentication, and a full-featured admin dashboard, achieving PCI-compliant security standards for 1,000+ transactions
- Engineered server-side rendering and database query optimization with PostgreSQL and Prisma ORM, reducing page load times by 40% and improving application scalability to support 200+ concurrent users

Banana Typing – Real-Time Typing Speed Test Platform *Next.js, TypeScript, Web Audio API, WebSocket*

Live GitHub

- Built a MonkeyType-inspired typing speed test platform with real-time WPM and accuracy tracking, helping 1,000+ users increase their typing speed by 52% within one month of regular use
- Engineered a custom Web Audio API sound engine delivering realistic mechanical keyboard keystroke and click sounds on every keypress, with under 10ms audio latency for authentic tactile feedback
- Optimized real-time rendering and state management, reducing input lag to under 5ms and improving average user session duration by 30%

Monk – Creative Agency Portfolio Website *Next.js, Tailwind CSS, Framer Motion*

Live GitHub

- Developed a high-performance creative agency website with 15+ advanced Framer Motion animations, including scroll-triggered effects and smooth page transitions, achieving full cross-device responsiveness
- Optimized Core Web Vitals through lazy loading, code splitting, and accessible component architecture, boosting Lighthouse performance scores by 45% and reducing bounce rate by 20%

EDUCATION

Bachelor of Technology in Computer Science 2022 – 2026

Parul University, Vadodara

Relevant Courses: Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Software Engineering
